

- on minimizing pollution, reducing waste, and alleviating other effects on the environment.
- The VP Business Development is a representative from the Senior Management Committee who will have the responsibility and authority to:
 - Ensure that the EMS processes are established, implemented, and maintained.
 - Report to Senior Management on the performance of the Environmental Management System and opportunities for improvement.
 - Communicate company wide the importance of the EMS and its impact on the success of the company.
 - We will regularly communicate our Environmental Management System to our clients, customers, and the public.
 - We will effectively manage the use of hazardous materials and products, and ensure that effective measures are in place to protect human health and the environment when such materials must be used, stored, and disposed of.
 - As required by legislation or where a significant health, safety, or environmental hazard exists, we will develop and maintain appropriate emergency and spill response programs.
 - We will promote reduction, reuse, and recycling in all of our activities.
 - We will promote efficient use of materials and resources throughout our construction jobsites including water, electricity, raw materials, and other resources.
 - We commit to restoration and rehabilitation of all temporary construction areas.
 - We will develop project specific Environmental Programs for our contracts.

Through continual improvement, training, and education of our employees, as to their responsibilities and the associated laws and regulations, Kenaidan will raise the environmental awareness of our corporate culture in order to ensure that the protection of the environment is an integral part of our collective activities.

David Kirkland
President
